

THE NEXT EVOLUTION IN MASTER KEY CONTROL

KNOX KEYSECURE[®] 5

Knox Master key control is elevated with new security and support capabilities. The KeySecure[®] 5 device leverages Knox technology to provide secure, rapid access when seconds matter.

KeySecure 5 features dual key security and KnoxConnect[®], a cloud-based management system, to configure devices, manage users, track access and review audit trails for accountability.

Flexibility

The KeySecure 5 holds up to two keys providing departments the ability to secure and support shared systems.

Security

Knox Master keys are securely locked and only accessible using a user-specific PIN code. All access activity is tracked through KnoxConnect.

Traceability

Tracking user access by name, date and time, the KnoxConnect maintains accountability and integrity of the system.

COMPONENTS OF THE KEYSECURE® 5

KNOXCONNECT

- A cloud-based system used to configure, program and manage the key control devices
- Admins have the ability to assign PIN codes, add / delete users, and create reports from any web enable device with a browser

KEYSECURE 5

- Secures up to two Knox Master Keys and a Knox Keywrench
- Releases key(s) with a secure individualized PIN code

MOUNTING BRACKET

- Mounts securely in an apparatus, vehicle, or office.
- Optional mounting brackets available in flat, 60 and 90 degrees.
