# CUSTOMIZABLE AND COLLABORATIVE ACCESS FOR SCHOOLS AND LAW ENFORCEMENT DURING ACTIVE SHOOTER INCIDENTS

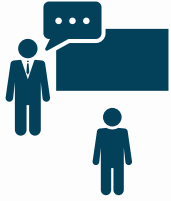

## ONE MASTER KEY.

Law enforcement ingress during active shooter incidents continues to be a significant issue for schools nationwide. The KnoxEntry System is a customizable and collaborative access program for schools and law enforcement that provides a secure and authorized rapid access technology.

- 
- Reduce response times and risks to students and faculty by providing law enforcement with keys, key cards, and floorplans, all stored in a single exterior secure repository for immediate entry
  - The Knox eLock System™ requires no batteries and provides ingress using a single master key
  - Each Knox eKey™ is a critical resource that can be provided to local, state, and federal law enforcement agencies
  - During active shooter incidents immediate entry into locked exterior and interior doors is simple and quick
  - Schools control and update contents in each KnoxBox

**The KnoxEntry System is the access solution for school districts and campuses of all sizes.**

### Instructional Training

- Comprehensive training included
- Knowledgeable and experienced instructors

### KnoxConnect™ Management System Software Contract

- Cloud-based System
- Syncs users and devices
- Audit trail records usage data
