

Knox Rapid Access System

Cut response time,
property damage
and key liability.

ACCESS THE COMPLETE, UL LISTED KNOX RAPID ACCESS SYSTEM WITH ONE MASTER KEY.

KnoxBox key boxes have been providing firefighters with safe and secure emergency access since 1975. More than 14,000 fire departments nationwide depend on the Knox Rapid Access System to access commercial, military and residential properties when responding to fire alarms or medical emergencies.

Knox rapid access devices are purchased by property owners in your jurisdiction. There is no cost to the fire department.

With **one Knox Master Key**, community buildings, gated complexes and fenced properties are immediately accessible. The versatile Knox Rapid Access System provides:

- **Immediate building entry day or night**
- **Time-saving response to false alarms**
- **Access to all properties with one master key**
- **Safe entry without force or injury to firefighters**

KnoxBox™ 3200

The leading high security, heavy-duty key box is used for most commercial applications including businesses, schools, government and public buildings, and community associations. The KnoxBox 3200 holds keys, access cards and small entry items. The box is UL1037 compliant.

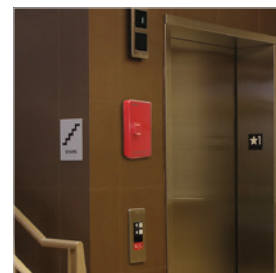

KnoxVault™ 4400

KnoxVault 4400s are used for high security storage in larger businesses, industrial properties, public buildings and universities. The KnoxVault 4400 protects and stores building keys, access cards and floor plans for emergency entry and is available with an optional keywrench holder allowing departments to keep a Knox FDC Keywrench on site. The vault is UL1037 compliant.

Knox Elevator Box

The Knox UL listed high security box is designed specifically for the elevator lobby where elevator keys and additional keys can be stored according to the latest IFC standard. The Knox Elevator Box is available in deep red, dark bronze, or aluminum, with a "Fire Department Use Only" banner. The box is UL1037 compliant.

Knox Document Cabinet

Knox Document Cabinet provides on site, high security storage for Safety Data Sheets (SDSs), Haz-Mat data, pre-fire plans and key storage. Used by industrial and commercial sites as well as universities and government installations, the Document Cabinet is UL listed against physical attack and meets SARA Title III storage requirements for chemical data. The cabinet is UL1037 compliant.

Knox FDC Protection Products:

Knox FDC Locks, Knox Storz Locks, Knox Standpipe Lock

Prevent potential FDC vandalism and maintain control of fire department sprinkler connections and standpipes with Knox locking caps: Knox FDC Locks, Storz Locks or Standpipe Lock. Knox locking FDC products protect both the intake and discharge sides of water-based fire protection systems from vandalism and prevent repeated sprinkler contractor service calls. All Knox FDC products are easily locked and unlocked with a Knox Keywrench. The locking caps are available in various diameters and thread types.

Knox Padlocks

Knox heavy-duty, brass bodied, all weather padlock secures any type of perimeter or fire access gate. This harsh-weather padlock is equipped with a stainless steel shackle, an EPDM rubber body cover, and an all-metal lock cover. The shrouded all weather padlock provides additional security against pry and cut attacks. The hardened steel Knox Interior Padlock secures interior fire sprinkler valves, equipment controls and utility storage areas.

Knox Gate & Key Switches

Excellent gate override for gated communities, apartment complexes, parking garages, pedestrian gates, emergency machinery shutdown and industrial gated areas.

KeySecure® Master Key Control

Knox KeySecure key control system keeps your department's master key locked in a visible position providing immediate accountability. KeySecure units generate an electronic audit trail and are simple to use and maintain. Provide key access by PIN.

Knox Remote Power Box

The Knox Remote Power Box houses an electrical service disconnect switch that can be used remotely by first responders during an emergency. The Remote Power Box is designed to remotely operate the building's shunt trip switch to disconnect electrical power to the building or heavy equipment.

Knox Residential Box

For residential use only, the Knox Residential Box holds a maximum of two keys. The residential key box provides entry for fire and medical emergencies on residences – single family homes and apartment complexes. It can be mounted permanently near the door or directly on the door. If the key box is needed only temporarily, a temporary door hanger is available.

Over forty years ago, Knox Company took on the challenge of developing a complete rapid entry system specifically designed for firefighters. In 1975, the first KnoxBox was introduced to the fire service and a unique concept in fire response was born. KnoxBox™ soon became the fire industry's high security lock box of choice. In 1981, a section of the Uniform Fire Code mandating the use of rapid entry lock boxes was adopted and remains in use today.

The Knox Rapid Access System has grown to include UL listed storage cabinets, heavy-duty padlocks and electronic override key switches. Complimentary products include Knox KeySecure® Master Key Retention Systems, Knox FDC locks and Knox DrugBox™.

This proven rapid access system reduces response times, property damage and the liability for lost keys. More than 14,000 fire departments, governmental agencies, military installations and the communities they serve depend on Knox products and services for its quality and reliability.
