

# FIRE DEPARTMENT - KNOX FDC EXPRESS PROGRAM

The Knox FDC Program helps protect fire department connections from theft, damage and debris. Our locking caps are currently, and will continue to be, installed by Sprinkler and Fire Equipment Installers throughout the United States.

The Knox FDC Wrench is common to all Knox FDC, Storz and Standpipe Locking Caps in every jurisdiction and are required to unlock and remove caps.

Please complete this form to receive (at no charge) Knox Wrenches for every FD vehicle in your jurisdiction and those providing automatic/mutual aid.

Upon completion of the FDC Express Program form your department will be added to the Knox Express system for FDC caps (this will **NOT** impact your current KnoxBox program). Prior to completing the program form, please review the information about the FDC Express Program at: [knoxbox.com/fdc-reg-express](http://knoxbox.com/fdc-reg-express). If you have questions please contact your Knox Territory Sales Manager.

**Important: The Knox FDC Wrench is required to open all FDC, Storz and Standpipe Locking Caps.**

Department Name:			
Street Address (If different than the mailing address provided below):			
Mailing Address:		Phone: ( ) ( )	Fax: ( ) ( )
City:	State:	Zip:	Population size of your jurisdiction:
List the cities, towns and counties in the FD service area:			
<b>AUTHORIZED SIGNATORY</b>			
An authorized signature is required to order FDC wrenches and receive program notifications.			
Printed Name:		Title:	
Signature:		Email Address:	
<b>ORDER FDC WRENCHES</b>			
How many wrenches are needed for your department's first response apparatus/vehicles? _____			
How many wrenches are needed for your Automatic/Mutual Aid department's first response apparatus/vehicles? _____			

Only authorized fire department personnel may place an order for Knox FDC Wrenches. Use of the Knox FDC wrench is solely for the purpose of accessing sprinkler and standpipe systems equipped with Knox FDC products. Should a wrench become misplaced, damaged or destroyed, a replacement can be requested by contacting Knox Customer Service.

**CHANGE NOTICE**

To change the authorized signature of record, complete the Knox Change Request Form, or submit a letter on the department's official letterhead, with an authorized original signature.

<b>FDC SPECIFICATIONS</b>			
Knox may require your thread specifications and a male/female thread sample to confirm the correct fit. Sample will be returned upon request.			
Our department uses National Hose (NH) thread (formerly called National Standard Thread – NST). <input type="checkbox"/> Yes <input type="checkbox"/> No			
If No, please specify thread size: (OD X TPI)	OD (Outside Diameter)	<b>X</b>	TPI (Threads Per Inch)
